DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a bathtub with a side entry door, classified in class 4, subclass 555.
 - II. Claims 7-16, drawn to a locking mechanism on a door, classified in class 49, subclass 202 and class 292 subclass 68.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the tub does not require a locking mechanism having rotatable vertical rod. The subcombination has separate utility such as a locking mechanism used for other closures that are not tub doors.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to the attorney of record on December 27, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3751

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
